San Francisco, April 24. Many began the work of reconstruction to-day. Temporary structures have begun to rise among the ashes of the ruined city. Many theories have been advanced as to who the woman is and her object in prowling around aimlessly over the counties. Some entertain the idea that she is crazy, while others maintain the idea that she is a "moonshine" detective, as the United State revenue offieers broke up a number of illicit distilieries around New Haven immediately after she left the vicinity.

GRADY DISCUSSES KENTUCKY SCHOOLS

Are Not What they Should be--Duty of SuperIntendents.

In my last letter to the RECORD I stated that the public schools of Crittenden county are failures. Furthermore the state superintendent is largely responsible for this. I have made the last statement to some Kentucky boys here in college. Many of them do not agree with me. I may be wrong. I must be blind. These boys say the schools of Kentucky are in a flourishing condition. I hope they are.

In the state of Kentucky are not the farmers in the majority? what is the duty of a state superintendent? I am not interested in what the law says. Is it his only duty to sit in his office. write examination questions, make reports and occasionally write an article to some school journal? caused by curable female diseases. It acts directly on woman's delicate organs, and restores their natural activity. By making the organs work normally, pain disappears, strength returns to the system, roses to the cheeks, and the frowns and wrinkles of suffering are seen no more. Mrs. Lucinda Johnson, of Walworth, Wis., writes: "I suffered agonies at

every monthly period. Nothing helped me until I took Cardul Now I can truly say I am cured." Try it.

CHEAPER FARM LANDS

Southwest Offers Rest Opportunities For Securing Homes.

Many farmers in the Northern and Pastern states are selling their high priced lands and locating in the Southwest. Many who have been unable to own their homes in the older country are buying land in the new

I'mismal opportunities exist along the lines of the Missouri Pacific-Iron delta lands and river bottom lands of Southeast Missouri, Eastern Arkansas, Louisiann and Texas, empable of producing 60 hushels of corn, a bale of cotton, 4 to 6 tons of alfalfa, 150 busheles of potatoes, and other grains, vegetaldes and buy crops, can be bought for \$7.50 to \$15.00 per acre. When cleared and slightly improved will rent for \$1 00 to \$6,00 per acre cash.

Uldands more rolling, lighter soil, adapted to fruit growing-peaches, pears, plams, grapes, berries, also melons, tomatoes and other vegetables, can be bought for \$5 to \$19, per some to unimproved state. Many places with small clearings and some improvements can be bought very cheup.

This is a fine stock country. No long winter feeding. Free range, pure water, mild climate. A healthy growing country, with a great future.

Write for map and descriptive literature on Missouri, Arkansas, Louisiana, Texas, Kansas and Indian Territory. Very chear rates on first and third Lucadays of each month.
